

RAINWATER HARVESTING TECHNOLOGY

from WEST COAST **POLY**

"Saving Water for a Sustainable Future"

"West Coast Poly the rainwater harvesting specialist"

With dwindling water supplies and increasing awareness of our water usage, installing your own rainwater tank can make a difference. It reduces the dependency on mains water and conserves water that would otherwise be cascading down the stormwater drains.

Great benefits are achieved with rainwater harvesting systems plumbed to the toilet and/or laundry using rainwater for your appliances in place of mains water. A sensor in your rainwater tank automatically switches to mains water when your rainwater is low and back to rainwater automatically once your tank water is replenished. Technology does the work for you, you won't even know which water you are using, but you will always be using your rainwater first.

Rainwater Harvesting packages consisting of a tank, pumping system and filter are available. These packages can be designed with different sized tanks and pumping systems to suit the individual needs and applications.

DID YOU KNOW?

Each year around 51,000 litres of water could be collected from a 125m² roof area and used to supply part of your household's water needs.

For every millimetre of rain on 1m² of your roof, you will collect 1 litre of water.

The greatest water savings are made by supplying appliances like washing machines and toilets, which use large volumes of water all year round. These two items (toilets & washing machines) use around 250 litres per day or half of all the water consumed in the average household.

"Conserve"

rainwater reward

A new initiative for the Lower Great Southern

Rainwater Rewards are available to residential and non-residential scheme users in

ALBANY-CRANBROOK-DENMARK-FRANKLAND-KENDENUP-NARRIKUP-MTBARKER-WALPOLE

The Water Corporation Rainwater Reward program offers the following rewards:

For a new rainwater tank that is plumbed in has a reward of up to **\$1000** or the cost of the tank & plumbing - whichever is the lesser amount;

OR

For an existing tank to be plumbed in has a reward of up to **\$500** or the cost of the plumbing work - whichever is the *lesser amount;

OR

For a new rainwater tank to replace one that is already plumbed in has a reward of up to **\$500** or the cost of the rainwater tank - whichever is the *lesser amount.
